

# Understanding your Shelby Energy bill: Changes and information

## 1. Account number:

Please note, this is where your Shelby Energy account number is located.

## 2. Kilowatt Hours:

This section shows the amount of kilowatt hours that you have used for the current month's bill cycle.

## 3. Charges and calculations:

**Energy charge:** Your bill will now contain the details explaining how your energy usage cost is calculated.

### Fuel cost adjustment:

This is used to recover a portion of the cost of coal and natural gas needed to run power plants, and costs to buy power from other utilities.

### Consumer facility charge:

This is the minimum bill charge that each member pays monthly to cover a small portion of the costs for Shelby Energy to provide electric service. This would be a member's bill amount with no energy usage.

### Environmental surcharge:

This reflects the cost of equipment and other expenses our power supplier incurs as it complies with EPA regulations on power plant emissions.

## 4. Telephone number:

Please ensure your account information is current by reviewing your bill, including the telephone number that we have on file.

**5. 13-month electricity usage:** This section shows members a 13-month history of their energy usage. It can help you review trends and evaluate the amount of energy you are using during specific times of the year.

**6. Important bill message:** Please make sure to pay attention to this message each month. It contains event, program, and other general information that is important to our members.

**\*\*If you would like additional information about your new bill format, please call us at 1-800-292-6585\*\***
